✨ White-Label Coaching Ecosystem

Next-Gen Coaching Management & AI Platform

Empowering coaching institutes with custom-branded web & mobile applications, digital study module distribution, AI-assisted learning tools, and automated operational management.

100%	4	AI Ready	Automated
Your Institute Brand	Role Dashboards	Tutor & Test Gen	Fees & Attendance

Executive Summary

This proposal outlines a complete digital transformation framework tailored specifically for coaching institutes. Instead of relying on generic third-party platforms, our solution delivers custom Android, iOS, and Web applications under your institute's name. It seamlessly integrates your proprietary study modules, automates daily attendance and fee management, connects teachers and parents in real time, and leverages AI to deliver personalized learning insights.

1 Core Value Pillars

🏷️ 100% Brand Ownership

Custom domain, custom app icon, color palette, and logo. Your students and parents see only your brand on the App Store and Play Store.

📚 Protected LMS & Modules

Distribute chapter notes, DPPs, recorded lectures, and test series securely with watermark protection and batch-wise access control.

💰 Automated ERP & Fees

Automate fee collection, digital GST receipts, WhatsApp payment reminders, and real-time attendance logs without manual intervention.

🤖 Integrated AI Engine

24/7 AI study assistant for instant doubt resolution, AI mock paper generator for faculty, and automated student weakness analysis.

2 Stakeholder Dashboard Ecosystem

Admin Command Center — Management

Complete operational control and financial oversight for directors.

- ✓ Real-time revenue, fee collection ledgers, and batch growth analytics
- ✓ Automated WhatsApp/SMS fee reminders & digital receipt generation
- ✓ Student, faculty, course, and batch setup directory
- ✓ Biometric, QR-code, and manual attendance tracking
- ✓ Multi-branch support with centralized director controls
- ✓ AI Predictive Attendance & Drop-Out Early Alerts AI

Teacher Portal — Faculty

Empowers teachers with fast content delivery and exam tools.

- ✓ Daily lecture timetable and upcoming batch schedule view
- ✓ Fast batch attendance logging with instant sync to parents
- ✓ LMS upload hub for chapter notes, DPPs, and video links
- ✓ AI Question Paper Generator from chapter question banks AI
- ✓ Automated online test evaluation & offline mark entry
- ✓ Direct student progress notes and feedback submission

Student Mobile App — Learner

Personalized learning environment driving student success.

- ✓ Instant access to institute study modules, DPPs, and notes
- ✓ Interactive practice quiz portal with step-by-step solutions
- ✓ 24/7 AI Study Assistant trained on institute curriculum AI
- ✓ AI Diagnostic Weakness Matrix highlighting weak topics AI
- ✓ Personalized timetable, homework alerts, and digital notices
- ✓ Protected offline document viewing inside the app

Parent Monitoring App — Parent

Builds trust with real-time updates and complete visibility.

- ✓ Live attendance check-in alerts and instant absent notifications
- ✓ Comprehensive test report cards, batch rank, and score trends
- ✓ AI Generated Progress Summaries highlighting learning gains AI
- ✓ Transparent fee payment ledger and direct online payment links
- ✓ Direct communication channel with institute administration
- ✓ Multi-child support for parents with multiple enrolled students

3 AI Capabilities & Technical Architecture

24/7 AI Study Assistant & Doubt Resolver

Student AI

Students can ask questions directly to an AI chatbot trained specifically on your institute's uploaded study modules and notes. It provides instant step-by-step guidance aligned with your curriculum, eliminating study roadblocks outside class hours.

AI Automated Test & Mock Paper Generator

Teacher AI

Faculty can generate balanced test papers for competitive exams (JEE, NEET, Foundation) in seconds. Teachers simply choose chapters, question distribution, and difficulty levels (Easy/Medium/Hard), and the AI auto-compiles the exam paper along with an detailed answer key.

AI Concept Weakness & Adaptive Learning Engine

Analytics AI

The analytics engine breaks down student exam responses to identify specific sub-topic weaknesses (e.g., Organic Chemistry mechanisms or Calculus integration). It automatically generates personalized micro-revision DPPs to help students overcome weak areas.

4 Security, Privacy & Infrastructure

Data Isolation & Security

Your institute's student data and proprietary study material are completely isolated. Encrypted at rest and in transit with watermark protection on PDFs to prevent leakages.

Multi-Branch Architecture

Manage multiple coaching centers under one master admin dashboard while maintaining branch-specific timetables, faculty assignments, and financial accounting.

High Scalability & 99.9% Uptime

Hosted on modern cloud infrastructure ensuring smooth performance during peak online exam submission windows and batch-wide push notification dispatches.
